# What is IASIR?

IASIR was founded in 1993 by a farsighted group of regulatory administrators who realized that by joining hands they could enhance their ability to regulate and promote professionalism of the private security, private investigative, alarm and related industries. Now, 25 years later, IASIR's membership has grown to include most state and provincial government regulatory agencies, as well as law enforcement and industry members from across North America and increasingly, other parts of the world.
